

Payment Plans

1. Minster Dental Centre Denplan Membership..... £6.07 per month

For a basic monthly fee you become a registered member of the MDC. This entitles you to be treated at the MDC and also includes cover if you need to see a dentist for an emergency appointment at home or anywhere in the world. Plus a 10% discount off routine check ups.

2. Minster Dental Centre Denplan Essentials..... £12.03 per month

In addition to the benefits of MDC membership this includes your check-ups and a considerable 15% discount off all private fees (see exclusions below).

3. Minster Dental Centre Denplan Care...from £20.16 to £62.90 per month

Through a simple monthly payment plan you are entitled to all dental treatment that is required to maintain your oral health (see exclusions below) You also get the benefits of MDC membership with worldwide emergency cover.

Exclusions - laboratory costs, root canal file charges, implants and complex cosmetic or reconstructive treatments.

*Notes

1. Direct Access

Direct access permits a patient to directly access the services of dental hygienists without a dentist prescription. At this practice this is a one off treatment and patients must join a payment plan and be assessed by a dentist before further treatment can be undertaken.

A hygienist can see you to provide oral hygiene advice, remove stain, tartar, bacterial deposits and other debris. In relation to gums the hygienist can advise you on the progression of gum disease but more advanced conditions need to be assessed by a dentist, and the hygienist then continues the treatment under the prescription of the dentist.

Dental hygienists can't diagnose or give the prognosis (likely outcome) of diseases such as decaying and broken teeth, or prescribe antibiotics, painkillers or any other drugs to alleviate symptoms.

Visits to hygienists are not a substitute for full dental examinations.

2. Root Canal File Charge

There has been considerable press coverage of the risk of CJD and other transmissible infections within the dental environment. One of the key areas of concern has related to the procedures surrounding the sterilisation and re-use of instruments used in the completion of root canal treatment (RCT).

In order that we maintain the very highest levels of cross infection control and patient welfare, we have introduced a system of disposable single use RCT instruments. Rather than raise the Denplan fees for all we feel that an individual cost of £51.25 applied in a similar way 'at cost' to the Denplan patient (like the laboratory fee costs associated with crown and bridge production) is a fairer and more equitable way of covering these costs.

The Minster Dental Centre

STATE-OF-THE-ART DENTISTRY

Outline Private Fee Guide
